

Olivia Ltd Hungary

Olivia Pannon White Plus program

Compliance with the requirements set out in the guidelines is verified in every year by Olivia Ltd.

The operator is responsible for compliance with the guidelines. A representative person is responsible for the introduction of Olivia Pannon White Plus.

Olivia Pannon White Plus is a large-bodied rabbit breed registered under an official authority number. The origin is Hungary.

1. General requirements and legal framework:

- The official authorization, listing, and registration of rabbit-keeping facilities are mandatory (in accordance with EU or national regulations); this must be evidenced by an appropriate official decision (containing the holding identification number).
- The manager of the animal holding facility must demonstrate the professional handling of animals (including, in particular, the care of sick and injured animals) by means of a certificate of professional competence issued by the authority.
- Rabbits are eligible to participate if their entire value chain: birth, fattening, slaughter, cutting, and processing is carried out in accordance with the requirements of the Olivia Pannon White Plus program.
- From the 5th week of life onwards, the rabbits must be raised in a barn in accordance with the requirements of this list of criteria.
- Stable Log is maintained on an ongoing basis: the placement/removal of animals, animal numbers, mortality, changes in feeding, the use of medicines (mainly antibiotics), and cleaning and disinfection measures.

2. Olivia Pannon White Plus program

2.1 Transport of live animals from the farm to the slaughterhouse: The rabbits originate from the farm's designated and marked housing facilities.

2.1 Materials for the activity must be available for the rabbits- wooden chew, coarsely structured fibrous feed or hay pellets are continuously available to every animal in the group.

2.2 Light: Natural day-night rhythm (at least 8 hours of light and 8 hours of darkness)- In the stable area, natural light must enter through a surface area equivalent to at least 5% of the stable's floor area.

Olivia Ltd Hungary

- 2.3 Feeding: The duration of feed use and the origin of the feed must be documented appropriately (retaining delivery notes; recording the usage period and the silo on the group record sheet).
- 2.4 Automatic feeding and water supply systems must be checked daily, and the checks must be documented. The sources at the farms are drinking- quality water and controlled fluently.
- 2.5 Use of feed exclusively with QS approval or QS recognition
- 2.6 Use of inherently robust and healthy breeding lines
- 2.7 Documented animal health monitoring, which includes recording slaughterhouse inspection results, mortality rates, and on-farm antibiotic usage. The data are accessible to every farm.
Veterinary treatments may only be carried out under the supervision of a veterinarian. The veterinarian maintains records of the prescribed treatments, paying particular attention to the withdrawal periods of the veterinary medicinal products used.
- 2.8 Continuous presence of an official veterinarian at the slaughterhouse
- 2.9 Animal density- place requirement

1-4 pieces animals	1650 cm ² /animal		
5-10 animals	1100 cm ² /animal		
11-24 animals	935 cm ² /animal		
>25 animals	770 cm ² /animal		

Group housing

Group size: at least 10 rabbits

Open-top enclosure, without wire flooring

Must allow for at least two consecutive hops; therefore, ideally, one side should be at least 1.8 m long.

A raised platform must be provided that complies with the following conditions: a surface area of at least 300 cm² per animal, at a height of at least 27 cm. The total size of the raised platform must not exceed 40% of the usable floor area.

- 2.10 Rabbit traceability is ensured at the slaughterhouse: from slaughter and packaging through to delivery.
- 2.11 They are checking compliance with animal welfare regulations.

Olivia Ltd Hungary

- 2.12 Adequate slaughterhouse hygiene. Compliance with requirements and evaluation of test results from accredited laboratories
- 2.13 Compliance with regulations: product placement, refrigeration, storage, product labeling

3 KO criteria at audit- you can use the Olivia Pannon White Plus Checklist to meet the program requirements

- 3.1 origin- traceability must verify from the farms till packaging at slaughterhouse, delivery
- 3.2 rabbit husbandry program starts at the 5 weeks old (until then, the animals remain with their mother)
- 3.3 not using wire floor
- 3.4 serious hygiene or animal health deficiencies- must document in a datasheet, must be available for the participants and for the authority
